

Mott MacDonald in North America

Opening opportunities with connected thinking.

In today's fast-changing world, you need advisors who can think laterally and search out the connections that others fail to make. You need pioneers with a thirst for innovation, who can turn obstacles into sustainable solutions for your organization, and for the lives you touch every day.

That's why you need Mott MacDonald. Our global network of experts never stop asking, "What if?" We constantly stretch our thinking, imagining elegant solutions for the most complex challenges. Yet in our drive for progress we never lose sight of the human impact of our actions.

Regional experience and relationships backed by global talent and resources

Mott MacDonald's roots in North America go all the way back to 1937.

Since then we've built an award-winning engineering and consulting capability that delivers successful projects to clients across the continent. Our growing range of sectors includes advisory services, the built environment, energy, transportation, and water.

We also bring our US and Canadian clients the benefits of world-leading expertise from around our global organization — particularly in climate change adaptation, P3 project consulting, sustainability, and alternative energy.

Adding to this is our proven record of delivering transformative results for our clients — achieved through technical ingenuity, collaborative problem solving, and time- and money-saving innovation.

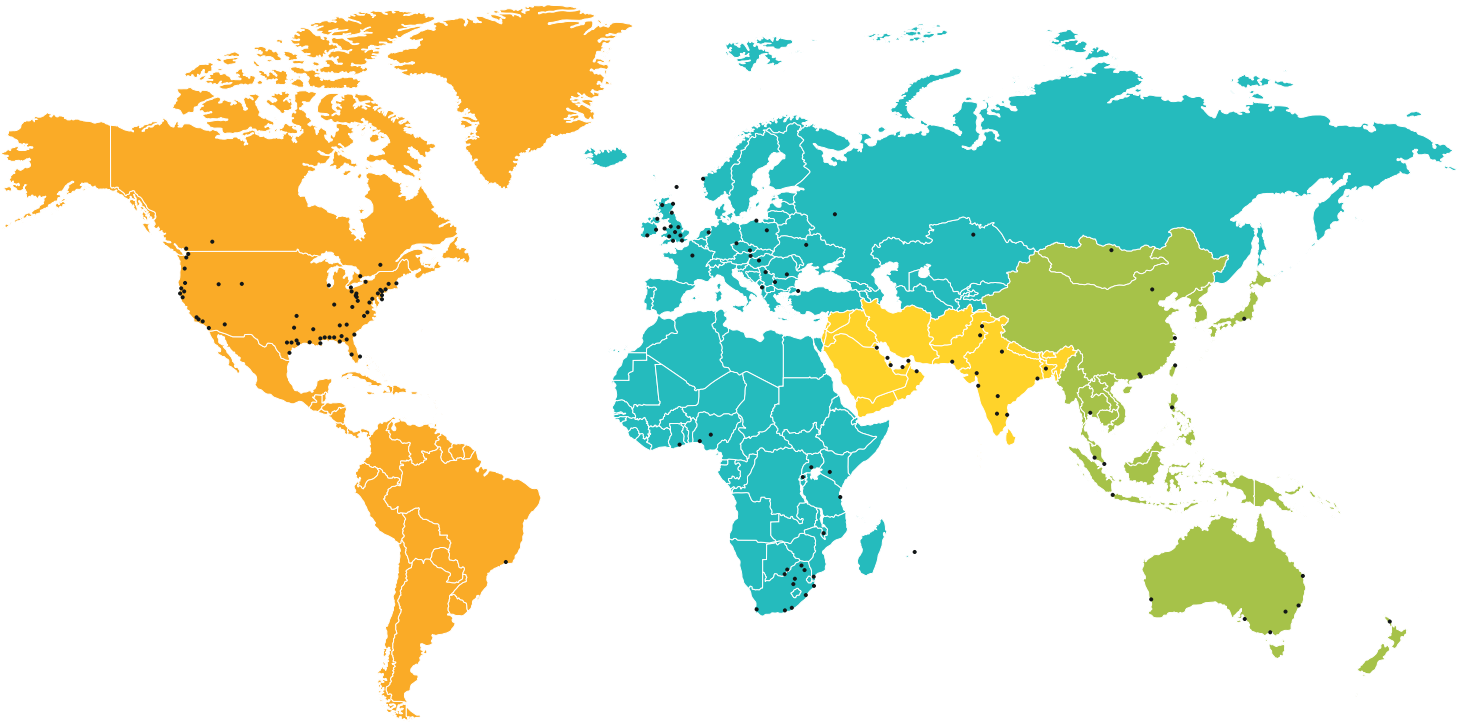

Our PRIDE values

Our global vision and values guide and underpin everything we do.

Progress

We embrace change and continuous improvement. We seek sustainable outcomes for our stakeholders, society, and the environment. We actively support the development of our staff and our professions.

Mott MacDonald works from more than 60 offices with more than 2,300 staff members in the US and Canada. Worldwide, our **16,000 employees** and **over 180 offices** deliver sustainable outcomes for clients in 150 countries and generate a global revenue of \$2.2 billion.

Respect

We respect the environment and the communities in which we work. We value all peoples and cultures equally, and promote equality, diversity, and inclusion. We treat everyone with respect.

Integrity

We deliver on our promises. We behave ethically and do not tolerate bribery or corruption. We promote a safety culture, targeting zero harm to all, and support the well-being and security of our staff.

Drive

We aim to exceed our clients' expectations. We encourage teamwork and deliver to the best of our ability, working as one firm. We work hard for professional and commercial success.

Excellence

We uphold leading-edge technical, professional, and safety standards, and seek to influence industry thinking. We develop innovative, efficient solutions that create value for our clients, by using leading-edge technology and the right resources. We are proud of our heritage and our achievements.

- 1. Parallel Thimble Shoal Tunnel**
As part of a joint venture, we are the lead designer for a major design-build project that will create a new bored tunnel between two artificial portal islands in Chesapeake Bay.
- 2. Regional Connector**
Los Angeles Metro's Regional Connector, now in the construction phase, will provide a seamless link for rides throughout Los Angeles County.
- 3. JFK International Airport Master Plan**
This major project will enable JFK to recapture its position as one of the world's great airports.
- 4. Block Island Wind Farm**
The success of this offshore wind farm project has set in motion the development of a further 300 megawatts of wind capacity off the coast of Rhode Island, and the potential of many more gigawatts of US offshore wind projects.
- 5. Liberty Island Water and Wastewater Upgrade**
Mott MacDonald designed a solution that used pipebursting and horizontal directional drilling to protect buildings, utilities, and historic sea walls while limiting disruption to visitors and staff.
- 6. Arbutus Greenway Project**
Our planning and design work is setting the stage for Vancouver's vision of blending facilities for bicycles, pedestrians, and a future streetcar with spaces for urban agriculture, public art, infill development, and community events.
- 7. PennEast Pipeline**
We are providing engineering, procurement, and construction management (EPCM) services for a 120-mile, 36-inch natural gas pipeline, bringing clean-burning natural gas to the northeastern US.
- 8. Mobile River Bridge**
As Project Manager and Owner's Representative, we are overseeing all aspects of the state's first public-private partnership project, which will replace the existing Bayway Bridges with a new 1,250-foot six-lane cable-stayed bridge across the Mobile River.
- 9. Silicon Valley BART Extension to Berryessa**
Extending service from Warm Springs to northern San Jose, this project positions us for the next extension of the Bay Area Rapid Transit system.
- 10. Carlsbad Desalination Plant**
Our technical advisory services helped create the largest desalination plant in the Western Hemisphere, producing an average of 50 million gallons (189 million liters) per day of fresh, high-quality drinking water.
